

Content requirements

The submitted manuscripts are considered for publication if they are intended only for this Journal, they have not been published already, nor are they under consideration for publication in press elsewhere. They should represent accurate, original and unique information concerning topical and significant scientific problems.

Articles should be written with utmost conciseness compatible with clarity of writing and finalized. It is not recommended to repeat the data from tables or graphs in the article text as well as represent numerical results in the form of graphs and tables at a time.

The publisher, the members of the editorial board and reviewers do not assume any responsibility for the content of the published article, nor the consequences of its disclosure. Articles ascertained in containing mistakes, violating copyright, publishing ethics, publishing requirements or providing misleading information, shall be removed without warning and compensation.

The author (or group of authors) is aware that they bear primary responsibility for the novelty and validity of the results of scientific research, which involves following these principles:

- authors should provide reliable research results; intentionally false or fraudulent statements are unacceptable;
- authors need ensure that the research findings, outlined in the submitted manuscript, are completely original. Extracts or statements taken from an external source must be presented with a clear reference to the author and the source. Excessive citations and plagiarism in any form, including unregistered quotes, paraphrasing or assignment of rights to the results of other people's research is unethical and unacceptable;
- author of the article should clearly present the references to other works that influenced the research;
- the list of co-authors of the article should include all those who have made a significant contribution to the research. It is unacceptable to include people who did not take part in the research as co-authors;
- if the author finds significant errors or inaccuracies in the article on the stage of the revision of the article or after its publication, he/she must notify the editor as soon as possible;
- all co-authors gave permission for publication in electronic printed version of Journal with open access.

Correct article design is presented in *DOC* attachment «*Example of article design – NoiseTP.doc*».

Incorrectly designed manuscripts could be removed from the publication if the author refuses to redesign their materials correctly.

Paper length

Papers have to be minimum 2 (summary) and maximum 20 pages long, written in correct English. The publication of any paper over 20 pages long is to be negotiated with the publisher.
